ACHIEVEMENTS

About us

VECTREV Engineering Solutions Private Limited is a forward thinking firm committed to deliver excellence in Engineering, Testing, Commissioning and Power System studies

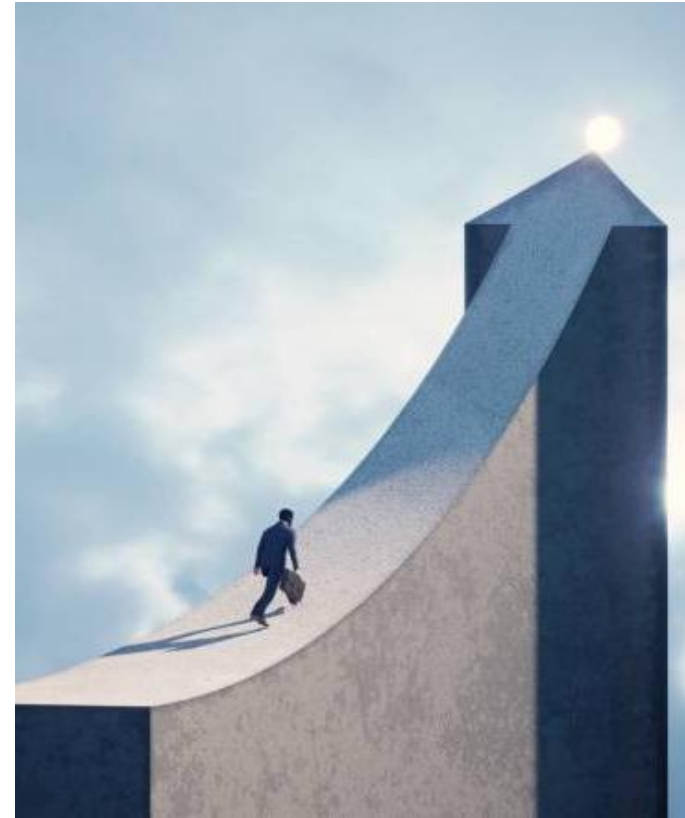

We operate around the globe, serving the sectors such as Power Generation Transmission and Distribution, Industrial Automation and Infrastructure.

Vision

To be a recognized and globally respected Engineering partner.

Ensuring every system we touch and performs with precision, safety and excellence.

To be the leading choice for the clients and professionals

Mission

To deliver high quality, reliable and innovative engineering services

To support our clients in achieving flawless Electrical system performance through precise testing, efficient commissioning and insightful power system studies

To ensure the seamless execution of electrical infrastructure projects by delivering precise, timely solutions

Our Philosophy

“Stay in the lane and run your own race”

What we do

We offers end to end engineering support including system design reviews, power system studies

We specialize in pre commissioning testing and commissioning of Electrical systems

We provides end to end design and supply of Electrical panels, tailored for Industrial , Commercial and Infrastructure projects

Engineering Services

Testing and Commissioning of AIS switchyard/Switchgear/GIS primary components

Testing and Commissioning of Protection relays, Control and Relay panels

Substation Automation System commissioning

Design and system load flow studies

Retrofitting and Refurbishment services

Annual maintenance and testing

Consultancy services | Site supervision

Engineering Documents preparation

Testing and Commissioning of HV & LV Equipment

Testing and
Commissioning of
switchgear equipment

Testing and
Commissioning of
switchyard equipment

Testing and
Commissioning of GIS
equipment

Testing and
Commissioning of DC
systems

HT & LT Equipment

Isolator / Disconnecting switch

Circuit Breaker

Current Transformer

Capacitor Voltage / Potential Transformer

Surge Arrestor

Power / Auxiliary and Special Transformer

Generators and Motors

DC charger Battery bank and UPS

Power and Control cables

System earthing

Testing and Commissioning Protection relays, Control & Relay Panels/ Retrofittings

Testing and
Commissioning of
Protection relays

Testing and
Commissioning of
Control & Relay Panels

Retrofitting solutions

Protection relays, Control & Relay Panels/Retrofitting

BOM Verification of the panels

Scheme checking

Configuration and Testing of Protection devices

Function check of the panels

Upgradation of scheme for the proposed new device

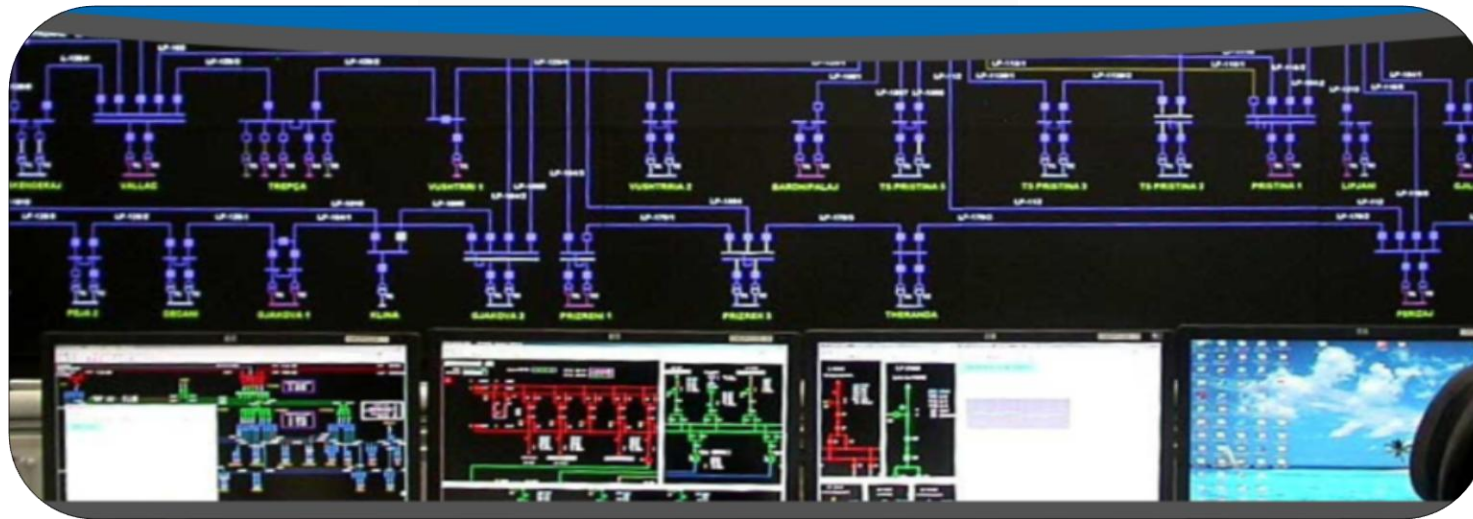

Dismantling of existing device | Installation of new device

Upgraded scheme checking

New device configuration

New device testing and commissioning

Commissioning of Substation Automation Systems (SAS)

Commissioning
of SAS

Substation Automation Systems (SAS)

Database creation

Ethernet switch configuration

Testing of BCU/BCPU and PMU

Integration of IED, Metering devices and GPS

HMI and Gateway configuration

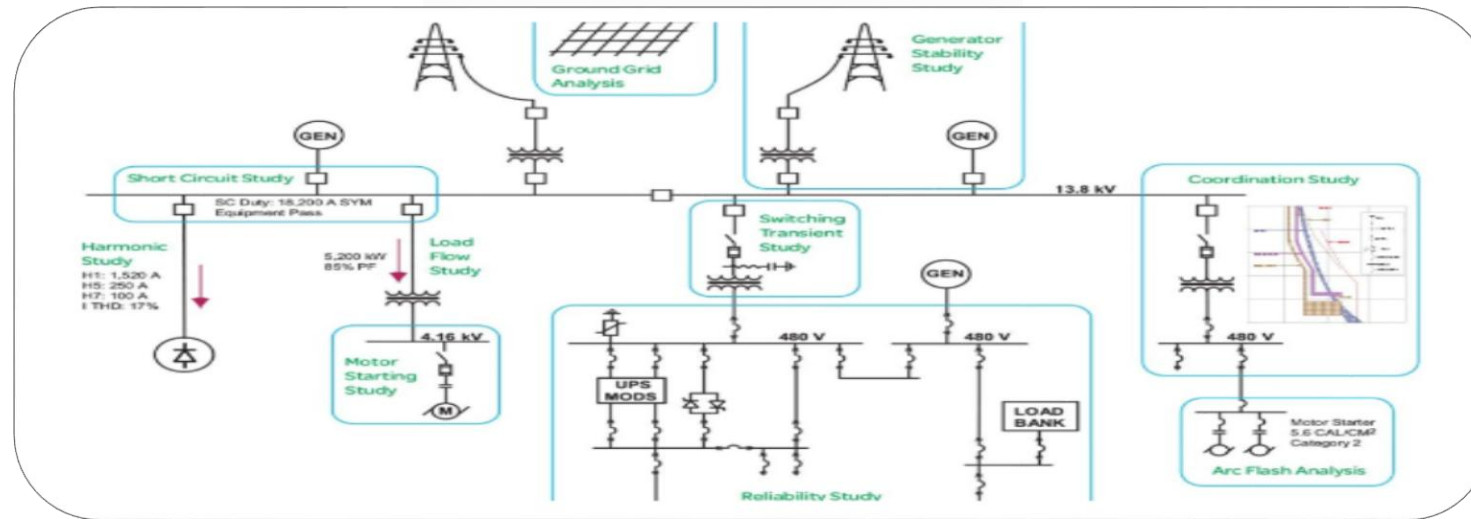

Communication establishing to Load control centers

Integration to third party systems

FTP configuration

Point to Point testing

Design and system load flow Studies

Power system
studies

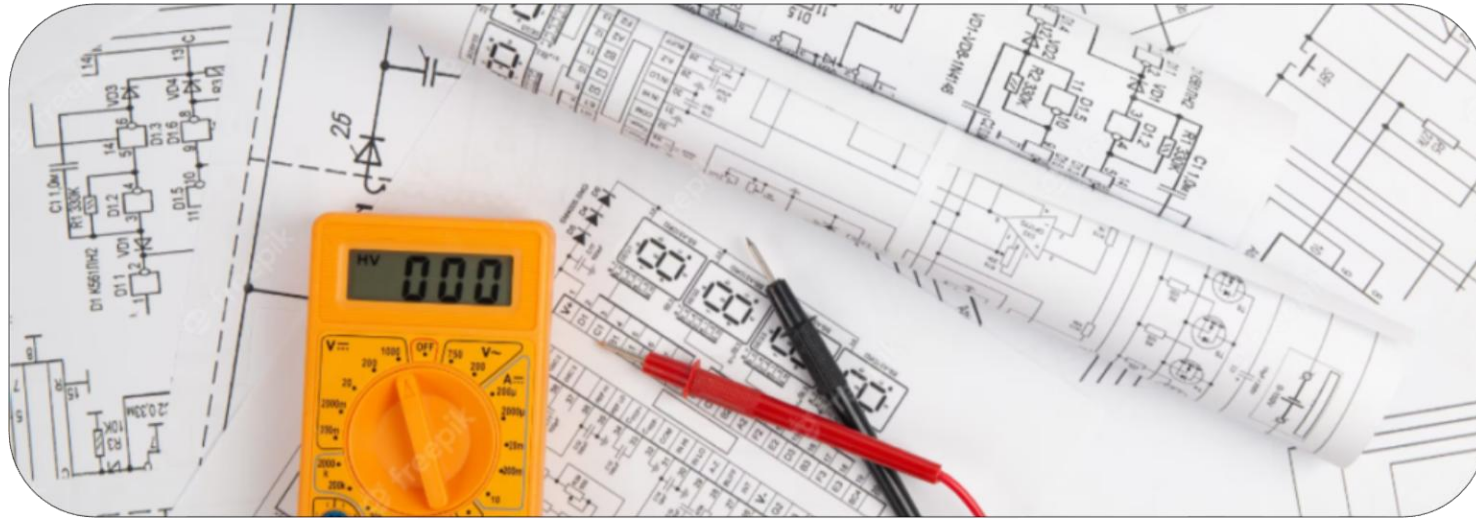

Design and system load flow Studies

Load flow, short circuit and power analysis

Harmonic analysis and report generation using power analyzer

Using of design software tools E-Tap power station

Engineering Documents preparation

Engineering
documents

Engineering Documents preparation

Design and sizing calculation of CT and PT

Power and Auxiliary transformer sizing calculations

Power and Control cable sizing calculations

Power and Control cable schedule preparations

Layout drawings | SLD preparations

Testing Instruments

Primary testing instruments

Secondary testing instruments

Basic testing instruments

Electrical Panel Solutions

Design and supply of LV and MV panels

Supply of PCC, MCC, PMCC, APFC, LDB, PDB and custom built panels

Panel upgrades, retrofitting and diagnostics

Quality checks and compliance as per IS/IEC standards

Metering panels equipped with energy meters

Primary testing instruments

CPC 100-Omicron

CP TD1-Omicron

CT Analyzer-Omicron

Circuit Breaker Analyzer-Megger

Sweep Frequency Response Analyzer-Omicron

Circuit Breaker Analyzer EGIL 200-Megger

Winding Resistance measurement kit

High Potential testing

Secondary testing instruments

CPC 356-Omicron

Sverker 750-Megger

Secondary Injection kit-
Sudharsan

Basic testing instruments

Digital Earth Resistance tester

Digital Multi meter

Digital current clamp meter

Digital leakage current clamp meter

Insulation tester 5 kV and 1 kV

Oil bath kit

Multifunction process calibrator

Key Achievements

- Upgraded the Proprietorship entity Shri Enterprises to Private Limited company, marking a major growth journey
- Handled testing and commissioning services project at African region with reasonable value

Previous Performance

- ✓ Various Electrical engineering material Export orders processed to Gabon, Central Africa
- ✓ Electrical engineering consumable material supply order processed to NLC Tamilnadu Power Ltd, Tuticorin

Previous Performance

Completed Projects-India

- ✓ Site supervision-Installation and commissioning (Electrical & Instrumentation) of Downhill pipe conveyor system from KTIO mines to PMBR, Karnataka
- ✓ Protection relays-Annual Maintenance Testing at Purna Sahakari Sakhar Karkhana Ltd, Hingoli, Maharashtra
- ✓ Site supervision-Installation and commissioning (Electrical & Instrumentation) of Coal storage, Coal mill system including fine coal silo building & pneumatic injection system at Goa- Actemium India
- ✓ Testing and commissioning of MV, LV switchgears, Transformers in 9MW Parsa solar power plant at Chhattisgarh-Varsha Solar Electric / Adani Renewables
- ✓ Testing and commissioning of one 132kV Transformer bay extension project at Chhattisgarh-Akshar Elecinfra Pvt Ltd / Adani Renewables

Previous Performance

Completed Projects-Overseas

- ✓ Testing and Commissioning of 225kV, Switching Station, Nkolkoumou at Cameroon
- ✓ Testing and Commissioning of 225kV/33kV, Substation Station, Oyomabang at Cameroon
- ✓ Testing and Commissioning of 225kV/90kV/33kV, Substation Station, Nkolbission at Cameroon

2025-26 Plans

- Aspirations
- New Initiatives

Aspirations

- KEEP GAINING THE TRUST FROM THE CLIENTS
- REACHING THE NEW CLIENTS THROUGH THE QUALITY SERVICES
- TO EXPAND OUR PRESENCE ACROSS THE GLOBE, DELIVERING WORLD CLASS ENGINEERING SOLUTIONS
- ADDING NEW INNOVATIVE PRODUCTS AND SERVICES IN OUR FLEET
- TO BUILD A HIGHLY SKILLED AND FUTURE READY TEAM THAT CONTINUOUSLY EVOLVES WITH INDUSTRY DEMANDS

New 2025-26 Initiatives

- Hiring new talents and training them to meet the market competitors
- Skill development and on field training programs to enhance the technical knowledge and safety practices among our team
- Reaching out global manufactures to add the innovative products in the fleet

Thank you
